**Active Learning Online Professional Learning Module**

**Description**

This module is designed to support instructors in engaging students by incorporating active learning strategies in the online learning environment.

Instructors will be presented with a series of online activities ranging from beginner to advanced in their implementation. Aligned with course content, each learning activity provides students an opportunity to apply higher order thinking and 21st century skills.

**Subject Terms**

- Active Learning
- Course Design
- Higher Education
- Applied Learning
- Engagement
- Online Activity
